Message from President

Everyone who cares about the interests of Durabook is welcome to read our corporate social responsibility report.

For Durabook, corporate social responsibility covers sound corporate governance, balancing the interests of stakeholders, protecting the environment, and contributing to society. For decades, Durabook has continued to focus on corporate social responsibility. The company that operates forever, reports on the continuous evolution of Durabook, about the process and performance of sustainable management, by publishing the 2019 Corporate Social Responsibility Report to our stakeholders.

First of all, looking back at the 2019 operating situation, the global market is facing an external uncertainty in the Sino-US trade war, and the computer industry is fiercely competitive, and gross profit is generally reduced. Thanks to the early transformation of Durabook, the new products drove the increase in average gross profit margin. Under the supervision of the board of directors, all colleagues implemented the implementation of the transformation strategy and the application of flexible tactics, and continued to strive to achieve the goal of strategic transformation and adhere to the fierce competition to get out of their own path.

Secondly, human resources are the foundation of the company's sustainable growth. Creating a harmonious and stable workplace environment is the direction of our efforts. In order to recruit and develop diverse talents, Durabook seeks personnel and conducts various educational trainings through different recruitment channels in order to connect with the world community. In the health care of employees, in addition to regular health checks, we also hold related health and safety lectures, promote healthy eating and drinking of colleagues, and encourage all kinds of balls, bicycles, running sports, etc., to maintain the daily health of colleagues. In addition, in order to understand the needs of employees, set up communication channels for physical and internal website mailboxes, and set up/end a labor-management meeting to understand employees' opinions. As a reference for organizations and units to improve, colleagues can have no worries in the organization. .

In addition, the environment is sustainable, and Durabook continues to develop and produce products such as notebooks and tablets that are environmentally friendly, efficient and durable. The energy-saving grades of the product series are verified by ENERGY STAR; through innovative design, the products are greatly extended. The use cycle, effectively reducing material

consumption, and the processes from research and development, procurement and manufacturing to after-sales service fully meet the needs of green products, fulfilling corporate citizenship responsibilities and reducing environmental burden.

Finally, "take it into society and use it in society." In terms of social care, Durabook uses its limited resources to exert its greatest strength. Focusing on the headquarters of the head office, we attach importance to helping disadvantaged groups and increase The intangible stability of the society; and the organization of a series of social welfare activities, showing continuous improvement in the environment, safety and health, society and other aspects, and encourage employees and relatives and friends to participate, to do their own efforts for social welfare with practical actions.

Looking forward to the future, Durabook will continue to cherish the earth's resources, implement corporate social responsibility, and continuously review the business direction. Durabook will also be more motivated, respond to the major themes of concern to stakeholders, and strengthen corporate governance and integrity, compliance, Economic performance, employee occupational safety, environmental protection and participation in public welfare activities are expected to continue to improve on the road of sustainable development. Finally, by issuing this report, stakeholders can understand our intentions and efforts to gain more recognition from stakeholders. Please give us guidance and advice, thank you for your long-term support.

Tom Wang

About This Report

This report mainly exposes Durabook Computer Industry Co., Ltd. (hereinafter referred to as Durabook, we or the company) in corporate governance, risk management, economic performance, supplier management, environmental protection, employee health and welfare, and participation in social welfare. Continued business efforts and performance.

Reporting period, criteria and scope

The information disclosed in this report is from January 1 to December 31, 2019 (102-50). In order to disclose the integrity of the information, if some information spans different years, this report will be separately indicated.

In order to expose the effectiveness of Durabook Corporate Social Responsibility and the results of communication with stakeholders, this report is based on the latest Global Reporting Initiative (GRI) published sustainability guidelines (GRI Standards 2016). The core option is used as the basis for writing the report (102-54) and is available in the GRI Guidelines Content Index in the Appendix to this report (102-55).

This report is prepared by Durabook. The financial data is consistent with the consolidated financial report data (102-45), covering Twinhead Taipei Headquarters, Kaohsiung Plant, Durabook and China subsidiaries, and is checked by KPMG International Cooperative. The environmental and social data only reveals Durabook in the United States and is calculated, counted and consolidated by the Durabook authority, and the correctness of the content is confirmed by the Durabook Corporate Responsibility Committee. Finally compiled into a report.

This report has been checked by the GREAT Certification according to AA1000 AS (2008), passed the first type (TYPE-1) medium guarantee level, and attached the verification statement to the appendix of this report for reference (102-56).

Reporting cycle and release date

This report is expected to be issued once a year (102-52)

Previous issue: June 2019 (102-51),

This issue: June 2020

Next release: June 2021.

Stakeholder Engagement

Stakeholder identification

The shareholders of Durabook are identified by the CSR Committee as: employees, customers, shareholders, suppliers and government agencies. Through the questionnaire design, the three levels of high, medium, and low-intensity analysis were conducted to identify the importance of the stakeholder's attention to the issue and the impact on the company's operational impact. After the identification of the members of the Corporate Social Responsibility Management Committee and the resolutions of the meeting, a total of 23 issues of interest were evaluated. A total of 7 items were included in the major topics, 12 moderate topics, and 4 low-level topics. Based on the results, we will write a report on 7 major topics. We will continue to communicate with stakeholders in the future and strive to maintain a good interaction and sustainable business relationship with stakeholders.

1. Corporate Overview

1.1 Corporate profile

Durabook Americas is the North American subsidiary of Twinhead International Corporation.

Durabook is a leading manufacturer of rugged computing solutions, including the Durabook line of laptops, mobile tablets and all-in-one computers. Durabook Americas (formerly Gammatech Computer Corp) covers and serves the entire continent of America. The DURABOOK brand is designed, manufactured and tested in-house to assure maximum quality and reliability. These purpose-built, cost-effective and ruggedized laptops, tablets, and all-in-one PCs are high-performance solutions that increase productivity, drive a clear return on investment and deliver a low total cost of ownership.

Rugged DURABOOK devices have a loyal customer base around the globe, including most branches of the U.S. Armed Forces, public safety agencies, numerous field service organizations, as well as companies that specialize in oil & gas, logistics, healthcare, utilities and automotive industries.

As GammaTech, the company distributed its line of laptop computers from the late 1980s into the new millennium, when shifts in the market required it to forge a new path. Due to increasing commoditization in the PC industry, the company adjusted its business model to focus on industrial and application-specific systems like those used by the military, public safety, oil & gas and field service organizations. This move allowed it to leverage its expertise in designing, manufacturing and supporting mobility solutions in a more differentiated and less crowded market.

In 2000, the company manufactured its first military-grade rugged laptop, followed by the introduction of the DURABOOK brand in 2002. The DURABOOK line quickly expanded to meet the demands of customers in a broad range of markets that require rugged mobility solutions.

In February 2018, with DURABOOK the primary focus of its business for over a decade, GammaTech changed its name to Durabook Americas. The name reflects the company's longstanding focus on the DURABOOK brand as well as changing market conditions that emphasize the need for reliable, purpose-built, mobile computing solutions.

For the next year, DURABOOK will established an additional office in Virginia, dedicated taking care of military and federal businesses, while the commercial team focusing on rugged computing solutions to commercial, public safety, state and local

government clients. This is the next step to expand the business given the strength of Durabook's rugged computing products and an enhanced commitment to the market and its customers.

From product design to complete product production process management, Durabook focuses on understanding the needs of the industry, and then envisions the plan and rapidly develops differentiated products. In response to the ever-changing changes, Durabook has introduced the ISO 9001 management system to strengthen sales and after-sales service management, while bringing products to market quickly, we also have high-quality guarantees to achieve our commitment to customers and implement "customer first, quality first". The goal. At the same time, Durabook has developed a unique supply chain management mechanism for the life cycle and maintenance life of industrial computers, ensuring that the production and maintenance of the components required for maintenance services are flawless, leaving customers with no worries. In addition, The parent company's (Twinhead) production center introduced an environmental management system of ISO 14001 (2015) in 2018, allowing us to ensure compliance with local environmental laws and regulations during the manufacturing process.

Looking to the future, Durabook will be committed to providing customers with a full range of services, continuous product diversification, high service quality and high flexibility in production, providing the best solutions for customers of different natures. The company will continue to deepen the technology of special application areas, establish corresponding core capabilities, and develop niche products to expand the development of different vertical markets, with a view to becoming the first-class professional IPC system supplier.

Organizational Chart of the Durabook

1.2 Business Policy (201 Economic Performance MA)

In recent years, notebook computers have continued to replace the growth momentum of desktop computers, especially in the military, industry, agriculture, gaming industry, automation, security control and other fields. Durabook thus avoided the low-margin competition according to the trend, moved to the niche and divided the market direction, moderately allocated the proportion of sales in each market, adopted different product sales and business strategies, and cored the target to actively develop new customers and new products. Market, integrated procurement scheduling to reduce costs.

At the same time, under the overall goal of “business first, quality first, and efficiency most”, Durabook will continue to avoid the low-margin Red Sea battlefield, and focus on developing and continuously strengthening the higher gross profit army/work rules. As well as niche products such as rugged portable computers, we are actively developing new customers and application markets by segmenting the market. In addition, we provide customers with a complete range of solutions (from product design to production, sales and after-sales service), and actively increase added value and gross profit margin to create greater profits.

Durabook is committed to enhancing the customer's reliance on our products, so as to stabilize the long-term relationship with customers. In the future, we will provide solutions and service systems for industrial customers with more diversified special application products, in order to become the most important supplier of IPC. The enthusiasm of business. Finally, Durabook will continue to deepen and promote various improvements and rationalization, strictly control costs, strive to improve efficiency, promote energy-saving measures, strengthen technical exchanges with customers and peers, and strengthen business physique.

Short-term business development plan

- Maintain service ODM customers, focus on their own products and brands, focus on defense, energy and communications industries, deepen strategic partnerships with large-scale system integrators, and establish their own channels to achieve maximum sales of independent products.

Medium and long-term business development plan

- Deployed in a more diversified special application product, expand sales channels, create a new application market, and provide industry customers with timely and appropriate solutions and service systems, in order to become a first-line IPC supplier.

1.3 Industry Chain (102-9)

The main business of Durabook is the sales of portable devices used in special industries such as military industry.

In the value chain, the system in the middle reaches is assembled. The upstream is mainly a general component supplier of computer products.

And military industry special component manufacturers, downstream are dealers and system integrators. For ODM business, end customers are leading brands in various application areas. Durabook's products are sold in Europe and America.

1.4 Participation Association (102-13)

In addition to focusing on its own operations, Durabook also attaches great importance to the interaction between industries. We have participated in many different associations, maintained good interaction with other members, and fully grasped the future development trend of the industry to adjust the business direction in a timely manner.

Participation Association	Participation role

2. Corporate Governance

2.1 Governance and integrity

Durabook's corporate governance is implemented simultaneously with the parent company Twinhead's operating model.

Durabook always believes that only transparent corporate governance and effective ethical and honesty mechanism are the key to the company's sustainable operation. Therefore, we establish the value of integrity and gradually internalize the integrity into the daily execution of the company's colleagues.

At present, Durabook has been formulating a code of practice for corporate

governance. At present, the exercise of the powers of directors and supervisors and the internal control system are implemented in accordance with the spirit and norms of the Code of Practice for Corporate Governance of Listed Companies, and the Legal Affairs Office is responsible for promoting corporate governance. Transaction.

2.1.1 Board Operations (102-18)

First of all, Durabook's core requirements for directors are integrity and integrity. The integrity of the company is the condition for selecting directors. Through regular re-election, select outstanding individuals who meet the company's operational needs. All appointments of the board are based on meritocracy. In consideration of the diversification of the members of the board of directors with objective conditions, in addition to the professional competence of the industry, the directors have rich practical experience and the pulse of the development of the industry. Secondly, in order to strengthen the special ability of the directors, Durabook encourages the directors to participate in the refresher courses held by various professional organizations, and enhances the knowledge and ability of the directors through further studies, thereby strengthening the functions of the board of directors. At present, the information of the directors of the company from time to time participating in external institutions has been disclosed. The information observatory was revealed.

Furthermore, the directors also adhere to the spirit of high self-discipline to avoid the interests. Durabook's "Rules of the Board of Directors" stipulates the system of avoidance of directors' interests. The directors have a stake in the meeting matters with themselves or their legal representatives, which is harmful to the interests of the company. The latter may not be included in the discussion and voting, and shall be evaded in discussion and voting, and may not act as an agent to exercise the voting rights of other directors. (102-25)

In addition, Durabook has written the liability insurance for directors and supervisors in the company's articles of association. At this stage, we will carefully evaluate the specific implementation schedule.

In the future, under the leadership of the board of directors, Durabook expects to be able to rise to the top in the corporate governance and economic performance, and continue to pursue excellence and move towards sustainable business.

Members of the Board

Title	Name
Chairman	Kao, Yu-Jen
Associate Executive	Tsai, Liang_Ching
Chief Executive Officer	Kao, Su-Fu
Associate Executive	Lu, Hsueh-Hsun
Director	Yang, Chien Kuo
Director	Lai, Chih Liang
Director	Wang, Hsuan-Lin
Director	Liao, Yueh-Ling
Director	Chang, Tao-Min

Note 1: The term of this director is from June 16, 2017 to June 15, 2020.

Note 2: Deducting two directors of legal persons, the other seven natural persons directors are over 30 years old and under 50 years old. There are 2 seats for those over 50 years old and 11% for female directors.

2.1.2 Compensation and Compensation Committee (102-36)

Durabook is a sound compensation system for directors and managers. It is fair and reasonable to assess the performance of directors and managers and the compensation they receive. The salary compensation committee (hereinafter referred to as the remuneration committee) is established according to law. The remuneration committee considers the directors in the assessment. Managers' performance appraisal and salary remuneration refer to the normal level of the industry, consider the relationship between individual performance, company performance and future risks, and ensure that there is no risk of leading directors and managers to pursue over-the-counter risk in pursuit of salary remuneration. the behavior of.

The Remuneration Committee upholds the manager's duty of care, faithfully fulfills the policies, systems, standards and structures for the performance evaluation and salary remuneration of directors and managers, and regularly evaluates and determines the remuneration of directors and managers. Wait for the authority and submit the recommendations to the board for discussion.

Durabook's reward and disciplinary mechanism for employees is also regulated in the "Work Rules", "Performance Assessment Management Measures" and related management rules and regulations to motivate employees and enable employees to grow together with the company.

2.1.3 Ethical Integrity (102-16)

In order to strengthen the business of its colleagues, Durabook can uphold the ethical principles of good faith, develop special internal regulations on ethics and integrity, and implement it after signing by the chairman of the board of directors to further implement the spirit of honesty and integrity.

At present, Durabook has clearly defined the rules of service for all employees in the rules of work, and at the same time, from time to time, it is important to promote

the integrity of its colleagues, so that colleagues can understand the spirit of integrity management. In the event of a breach of good faith, the company will properly discipline the work rules according to the circumstances. In order to keep abreast of the latest requirements issued by the competent authorities in terms of ethical integrity, we regularly send personnel to participate in external education and training on integrity management, and report relevant content to the company's supervisor. Durabook will explain the personnel rules and regulations by the staff of the department in charge when the new recruits report, and at the same time announce the company's intranet, so that all colleagues can check the regulations at any time. If the colleagues have any ambiguity about the personnel regulations, they can also consult with the staff of the authority department. Durabook also requires new employees to sign an employee's job agreement at the time of registration, and reiterates the necessity of integrity management. All issues involving integrity will be reported to the senior executives by the designated department, and the responsible department will be responsible for taking appropriate corrective actions and Punish measures and track them regularly.

For the reporting mechanism, Durabook has an acceptance mailbox, and the reward and disciplinary system is clearly defined in the employee's work rules, and the audit room is assigned to conduct the project audit according to the circumstances. After the company accepts the report, it performs and records according to the standard operating procedures, and strictly guards the confidentiality of the prosecutor and the contents of the report. We protect prosecutors from improper handling due to accusations. No letter of inquiry was received in the 2018 mailbox.

2.1.4 Internal audit

In order to implement internal control, Durabook meet the parent company Twinhead's independent auditing office requirement. The auditing staff performs independent and objective and detached positions and performs relevant work according to the audit plan to confirm that the company's internal operations comply with laws and internal control systems. In addition, the project audit will be carried out according to the situation and the board of directors will be provided to understand the risks of operational hiddenness in a timely manner. Secondly, the board of directors will assist the independent and objective evaluation of the completeness, effectiveness and implementation of the internal control system, and provide suggestions for improvement in a timely manner to ensure internal control. The system can be implemented continuously, and relevant investigation, evaluation or consulting services are provided to assist the board of directors in fulfilling their corporate governance responsibilities. At the same time, the auditors' professional competence is enhanced to enhance and maintain their audit quality and execution results.

The Audit Office also regularly checks the control points in accordance with the spirit of the powers and responsibilities, relevant management rules and regulations, and the internal control system, reports to the Board of Directors on a regular basis, and reports to the independent directors when necessary. In order to ensure the implementation of integrity management, Durabook has established an effective internal control system and accounting system, which is regularly audited by internal auditors; the annual accountant will also conduct a review of the company's aforementioned system.

2.1.5 Risk Management (102-11)

In response to the uncertain risks faced by the company's operations, Durabook is not regularly discussed and responded by the management. After the decision is made, it is handed over to the business responsibility department for implementation, and the results are reviewed at any time.

Risk project	Risk description	Risk response
Financial risk	The company is unable to pay interest or principal due to debt financing on time and has the possibility of bankruptcy	Adopt comprehensive risk management to clearly identify, measure and control all risks of the company (including market risk, credit risk, liquidity risk and cash flow risk), so that the management of the company can effectively control and measure market risk, credit risk, Liquidity risk and cash flow risk.
Operational competition risk	The component supplier has a long delivery period and a minimum order quantity.	Establish buffer stock, effectively use the inventory loop mechanism to avoid the situation of short supply.
	The growth of the market scale has slowed down. The low-cost peers in the same industry and the large-scale commercial enterprises have robbed the military/regulation market, resulting in increased price competition pressure and severe exploitation of profit margins.	<ol style="list-style-type: none"> Durabook continues to increase investment in research and development, deepen research and development capabilities, strengthen marketing acumen, develop products of different levels, functions and styles according to customer needs, and aim to develop high value-added vertical market products to maintain expected profits. Develop opportunities to work with major international companies to reduce procurement costs with their influence.
	The key components depend on imports, and the products are mostly in the US and Europe. The risk of exchange rate fluctuations will also affect the company's profit.	<ol style="list-style-type: none"> Increase the added value of product design to reduce the proportion of the cost of component procurement. Strengthen the concept of remittance and avoidance of financial personnel, and judge the exchange rate trend at any time to evaluate the use of risk-averse foreign exchange operating tools in a timely manner.

Risk project	Risk description	Risk response
Environmental pollution and climate change risks	Global climate change, countries are actively investing in new energy and alternative energy development. Energy conservation and carbon reduction issues are closely integrated with the goods and services provided by enterprises, directly or indirectly affecting the operation of enterprises and consumer behavior.	<ol style="list-style-type: none"> 1. Design energy-saving and carbon-reducing products. 2. Products continue to comply with green product regulations and customer requirements 3. Cooperate with government energy conservation policies.
Product liability risk	Due to differences in legal systems and regulations, they often fail to properly manage the legal environment and regulations, and fail to properly manage the serious consequences of product liability risks, which puts the company at great operational risk.	<ol style="list-style-type: none"> 1. Establish a regulatory system 2. Implement product safety and patent management monitoring mechanism
New infectious diseases	Serious impact caused operation interruption and personnel safety.	<ol style="list-style-type: none"> 1. Set up an ad hoc group. 2. Continuously monitor the epidemic period information and adjust in time in accordance with government regulations. 3. Implement the job agent mechanism. 4. Implement the mechanism of new epidemic prevention and response measures.

2.1.6 Regulatory compliance (307 & 419MA, 307-1, 411-1)

Regulatory compliance is fundamental to the operation of Durabook. Compliance with regulations can enable stakeholders to trust Durabook and create a win-win situation. If illegal records occur, it will affect the normal operation of Durabook. Therefore, Durabook regards the compliance as a colleague. The basic requirements, always remind the colleagues in the process of implementing the business should be based on law-abiding, and then shape the corporate culture of compliance. Durabook has always followed the company law, the securities trading law, the commercial accounting law, the relevant regulations on the listing of the cabinet and any other regulations concerning environmental protection, labor human rights and product liability, in order to thoroughly implement the regulations and follow the practice. Durabook requires all departments to continue to improve compliance with regulations and to consolidate Durabook's law-abiding culture. Based on the concept of integrity, transparency and responsibility, we must establish a good management and risk control mechanism, and the authorities will pay attention to their business with their duties. The relevant regulations are promulgated and amended to ensure that Durabook is implemented in accordance with the latest regulations. If the regulations are changed, the internal regulations of Durabook shall be revised and revised in time.

In order to enable interested parties to facilitate the use of the prosecution mechanism, Durabook can promptly pay attention to the risk of compliance, and Durabook has established acceptance channels including employee opinion mailboxes and external stakeholders' mailboxes, so that stakeholders can report violations in a timely manner.

Behavior (including reporting). In addition, the Durabook's legal advisor has a full-time review of the contract for Durabook's external transactions, ensuring zero illegal records.

Durabook promises that no illegal records can be made in any regulation. Also because of the pre-opening regulations control mechanism, Durabook did not receive any internal and external reporting records in 2019, and it has not received any internal and external reporting records, regardless of integrity management, business accounting, environmental protection, labor human rights and product liability. There are no illegal records.

2.2 Financial performance

In pursuit of financial sound growth, Durabook is committed to its shareholders and its commitment to its employees. Its financial performance continues to grow, allowing Durabook to share the sweet fruits of economic growth with its employees, improve employee compensation and benefits, and further maintain employee compensation. The company's centripetal force creates a happy corporate atmosphere.

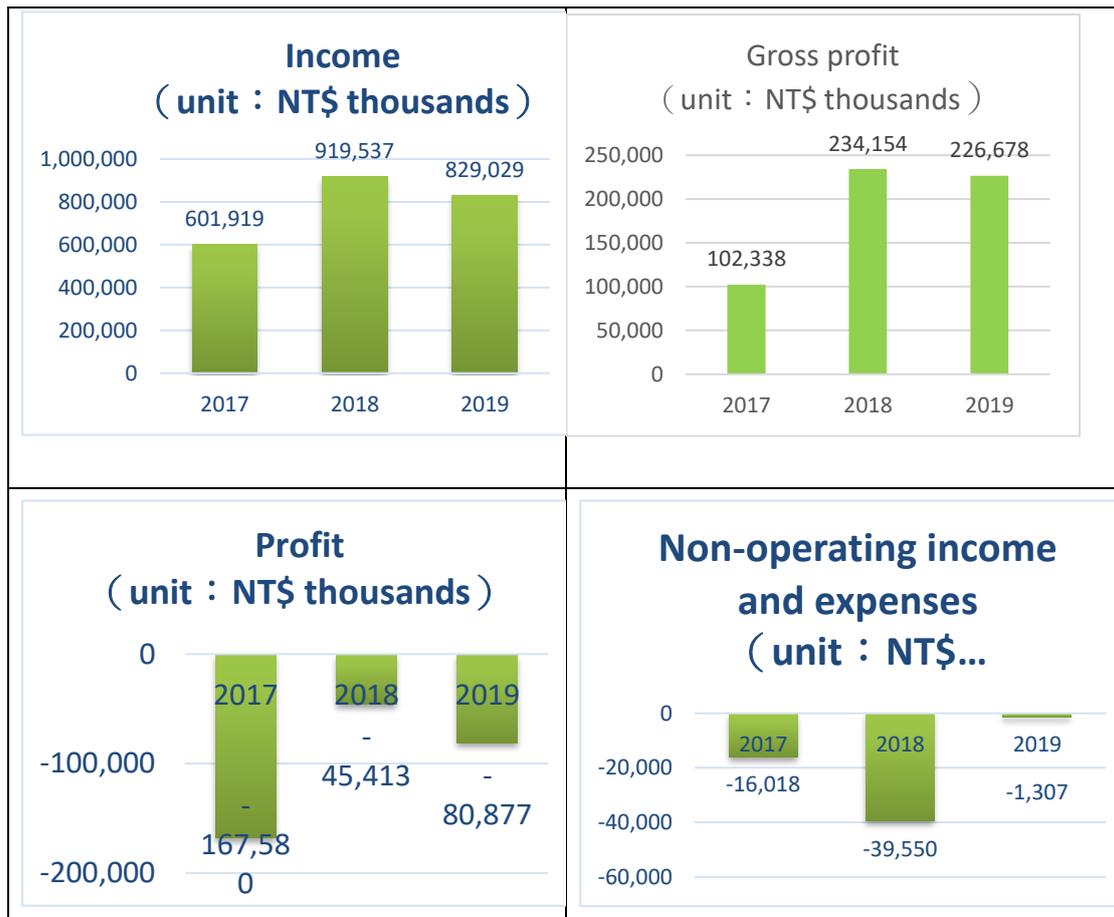

2.2.1 Economic performance (201MA、201-1)

Management measures

- For the Group's overall operations, an operating plan was prepared at the end of the previous year to clarify the revenue, gross profit, expenses and profit and loss targets of the parent and subsidiary companies, and review and manage them separately after monthly settlement.
- For the performance revenue, the sales plan was formulated at the end of the previous year, and the business review meeting was conducted in the bi-weekly business review meeting according to the product area, customers, business objectives and work priorities.
- For other work priorities, formulate an action plan at the end of the previous year, clearly define the units of responsibility, work objectives and implementation priorities, and follow up on the monthly management meeting.

Tracking confirmation

- In response to the overall operational status of the Group, it will be reported separately at the monthly business performance meeting. The chairman will review the improvement matters and be tracked by the auditing unit.
- For the execution status of the sales plan, it will be reported separately to the management meeting hosted by the general manager each month for the supervisor to discuss the effectiveness and improvement plan.
- In response to other work priorities, the general manager and the director of authority and responsibility will separately hold meetings to review the progress according to the implementation schedule.

2.2.2 Purchasing and sales

Local procurement can effectively reduce transportation costs for the company, and can also drive the economic activities of local suppliers, promote economic growth, and enhance industrial development. Therefore, DURABOOK purchase in the United States takes materials as the priority, and the overall product purchase is the largest. The main product purchase is Taiwan (204-1). Durabook implements the local procurement policy, and Local suppliers coexist and coexist.

While introducing CSR corporate social responsibility, DURABOOK also hope to achieve sustainable development through the participation of source suppliers. Continue to implement existing supplier management systems including hazardous substance management (GP), continue the implementation of ROHS 2.0 throughout the supply chain in 2019, implement GP investigations in accordance with the Hazardous Substance Management Measures, and manufacturers sign declarations or declarations to implement GP raw materials. Management, and through the supplier audit implementation check. There were no major changes in the supplier compared to 2019. The environmental management of the suppliers in 2019 was in line with the environmental requirements of the company, and no environmental violations occurred. Regulatory events.

3.Environmental sustainability

3.1 Environmental management

DURABOOK is in the pursuit of balanced development and sustainable management. The general manager signed the DURABOOK safety and environmental protection policy, and vowed to protect the environment and maintain community safety. Environmental protection is beneficial to the public's products, taking safety, health and environmental protection as the basic consideration for the company's sustainable operation.

Our promise:

Compliance with regulatory requirements: All products, activities and services of the company are in compliance with and comply with government environmental regulations and other requirements.

Promote risk management: reduce environmental impact and reduce the impact on people and the environment.

Continuous work improvement: Regularly review management performance and continue to work toward zero disasters, zero accidents, and zero pollution.

Implement training and publicity: Make all colleagues aware of company policies and responsibilities to stakeholders, and provide necessary job training.

Meet customer needs: fully realize the commitment to customers, and enable customers and suppliers to understand the company's environmental policy

Our approach

【Carbon reduction】

Process improvement in the production process, so that energy can maximize the benefits of reducing carbon emissions, and included in the management objectives to reduce carbon emissions year by year, in order to fulfill the responsibility of corporate citizenship.

Office air conditioning temperature adjustment 26 ° C, reducing excessive carbon

emissions.

【Waste Reduction - Garbage Classification】

- Promote waste sorting and set up resource recycling bins to reduce waste.
- Promote the use of disposable tableware and reduce the amount of domestic waste.

【Business waste】

The business wastes in the enterprise are regulated according to the management methods, and are classified and stored according to the chemical characteristics of each waste, and then commissioned by qualified manufacturers for cleaning.

【Green procurement】

- DURABOOK is committed to providing products that do not contain the SVHC announced by REACH.
- DURABOOK comply with the EU RoHS environmental protection regulations and promote green procurement management. In addition to requiring suppliers to provide materials that do not contain hazardous substances, the company does not use raw materials or materials containing hazardous chemicals in the production process.
- DURABOOK continue to produce products that meet EPEAT requirements.

【Emergency response】

- DURABOOK have an emergency response plan, set up an emergency response command center, and plan emergency response teams, including notification contact group, rescue team, disaster relief information group, control group, rescue team, public relations team, etc., in case of emergency Emergency response and handling by the emergency response team. Every six months, regular emergency training and fire drills are held. New employees are required to actually operate fire extinguishers and simulate the practice through the drill team to develop their ability to respond urgently and self-safely. When the disaster has not been expanded, they can take appropriate action. Action to reduce the impact and damage caused by the crisis.
- Cooperate with the fire brigade to train employees on fire escape, first aid and other related training.

In 2019, according to the emergency response plan, a total of 1 emergency response drill was conducted. According to the task group, the on-site commander will inform the rescue team, the guard communication, the evacuation inducement, the safety officer, etc., so that the colleagues can quickly dispose of the emergency and reduce the injury and environmental impact.

3.2 Pollution Prevention

3.2.1 Business waste management :

We committed to reducing the consumption of various resources and using recycled materials that have a low impact on the environmental load, such as: Office paper is preferred to use recycled paper, and paper is required to be used on both sides to enable the sustainable use of the earth 's resources.

- Office waste is divided into general waste and resource recycling. The waste removal and transportation committee is handled by private companies. At the same time, colleagues are encouraged to use environmentally friendly cups and tableware to reduce waste generation.
- Waste information equipment, toner cartridges, etc. are collected by the manufacturer.
- Set up a recycling paper area next to the photocopier to allow colleagues to reuse single-sided waste paper to reduce paper consumption.
- Committed to implement paperless, make good use of electronic official document system, replace the traditional paper official document circulation and signing process.
- Promote double-sided printing or multi-page printing to save paper and toner consumption.

3.2.2 emission of greenhouse gases

To monitor and to reduce greenhouse gas (GHS) emission, Durabook International Corp follows ISO 14064-1 and Greenhouse Gas Protocol requirements and maintains a complete file of its GHS emission. It calculates direct GHS emissions as defined in Scope 1, indirect GHS emissions as defined in Scope 2, both qualitative and quantitative, as well as other major indirect GHS emissions as defined in Scope 3 by qualitative approach.

DURABOOK direct greenhouse gas emissions, mainly based on refrigerant types and fillings and carbon dioxide emissions statistics. In the discharge part of the refrigerant, mainly for the refrigerant filling amount estimation of the air conditioner, a total of 140T and 100T each of the cold air is transported by the chiller, which is currently fixed in the third quarter of each year for maintenance and replacement. The emission of carbon dioxide is calculated by the conversion of electricity.

DURABOOK is an office work type, so greenhouse gas emissions are converted by water and electricity usage. The direct GHS emission (Scope 1) in 2019 is as indicated as 0kg CO₂e. Calculation results for the DURABOOK's Scope 2 GHS emission in 2019 are as indicated 35,593 kg CO₂e. Scope 3 (other indirect GHS emission) is 0 kg.

3.3 Energy saving and carbon reduction

3.3.1 Resource management

The earth resources are limited, and DURABOOK pay attention to the management of energy resources in order to avoid improper waste. The company's energy resources mainly include the use of water and electricity. Responsible for energy conservation and

carbon reduction through daily management mechanisms, the relevant measures are as follows:

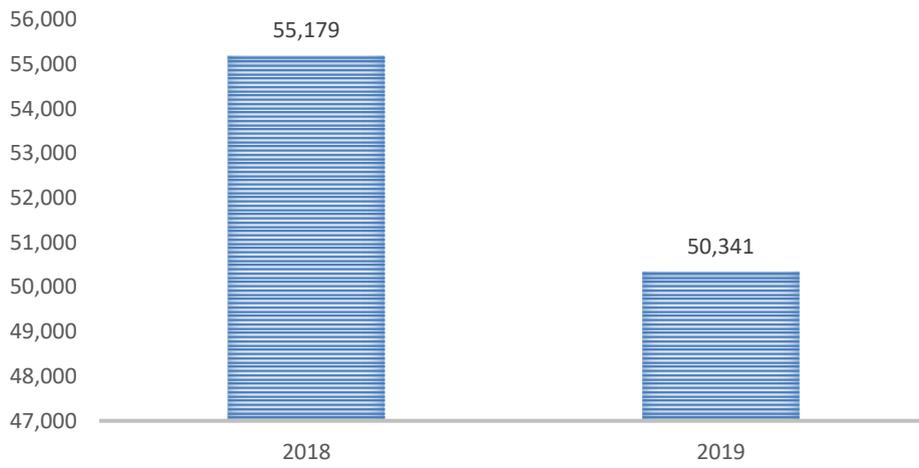

- a. Lights in the office, warehouse and breakroom are turned off at night, except for security lights.
- b. External security lights are motion controlled.
- c. When no motion is detected for approximately 5 minutes the lights switch to half power.
- d. Office temperature is on auto control set to 78° F.
- e. Electricity is built into the monthly lease as a fixed fee.
- f. Fire sprinklers are inspected quarterly by the Fire Sprinkler company.
- g. Office equipment have been kept for future use.
- h. When office equipment is deemed obsolete, the will be sent to a certified e-Waste collector for reuse or recycling.
- i. Screen savers are set on all computers that are fixed in position.
- j. Employee used computer devices are turned off when the employees leaves the work place.

The energy consumption of each energy source will be statistically analyzed monthly according to the consumption of it from 2017. If there is an abnormal consumption in the month, the project will continue to improve. Count the amount of energy resources used as follows:

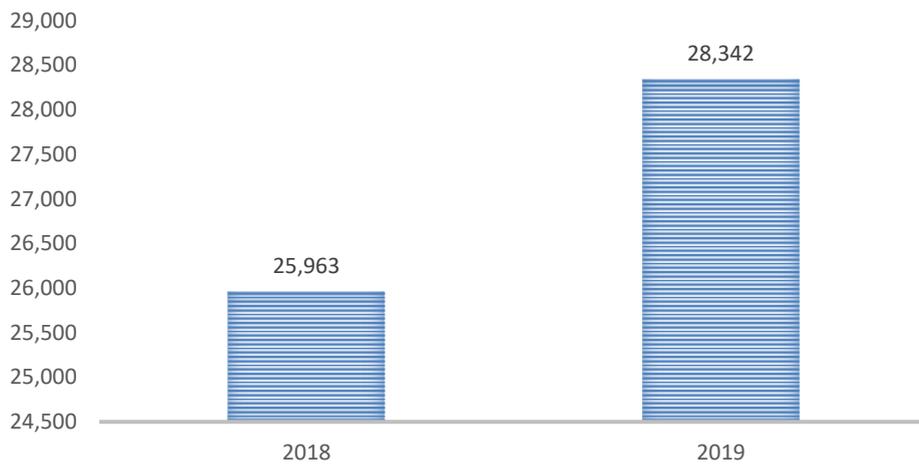

Energy usage list

Scope	Operating base	DURABOOK	
	year item	2018	2019
Scope 2	Electricity usage (kWh)	55,179	50,341
	Electricity-Co2 emissions (kg)	39,014	35,593
Water usage list			
Resources	year item	2018	2019
	Water usage (Gallons)	25,963	28,342

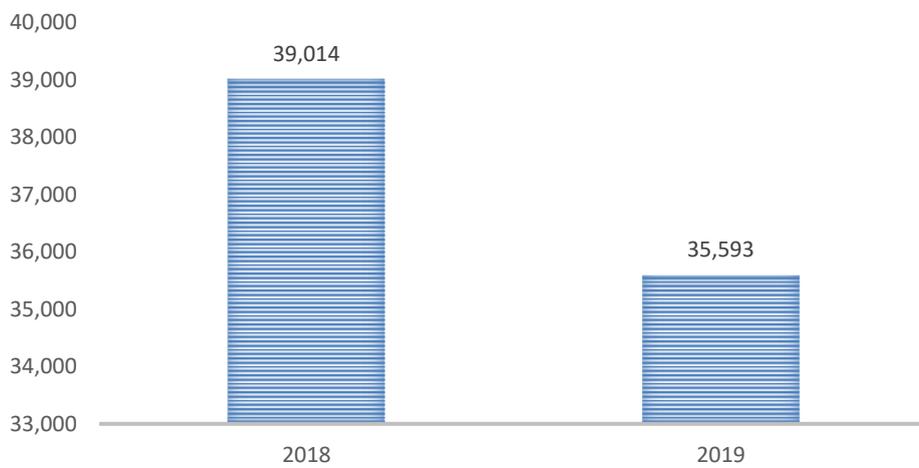

ELECTRICITY USAGE (KWH)

WATER USAGE (GALLONS)

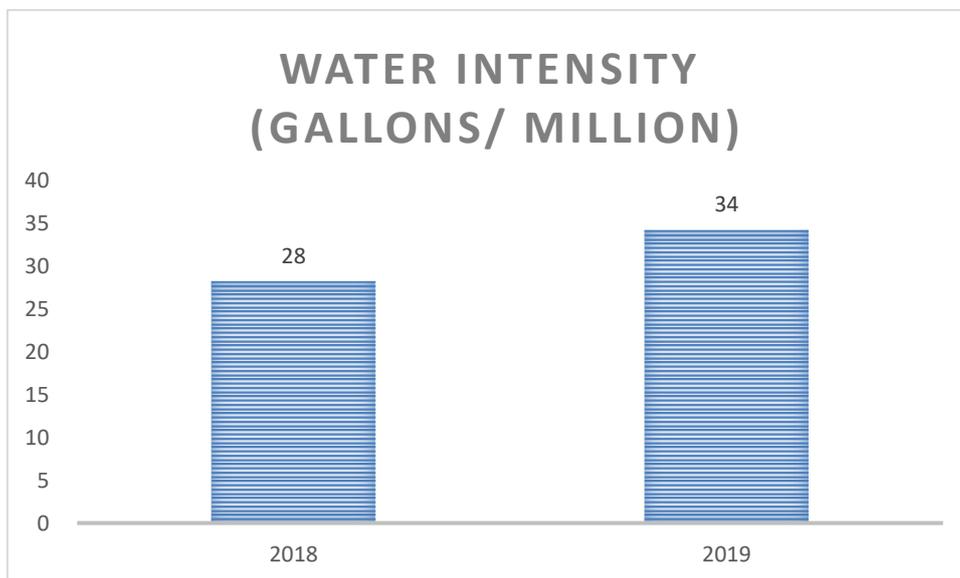

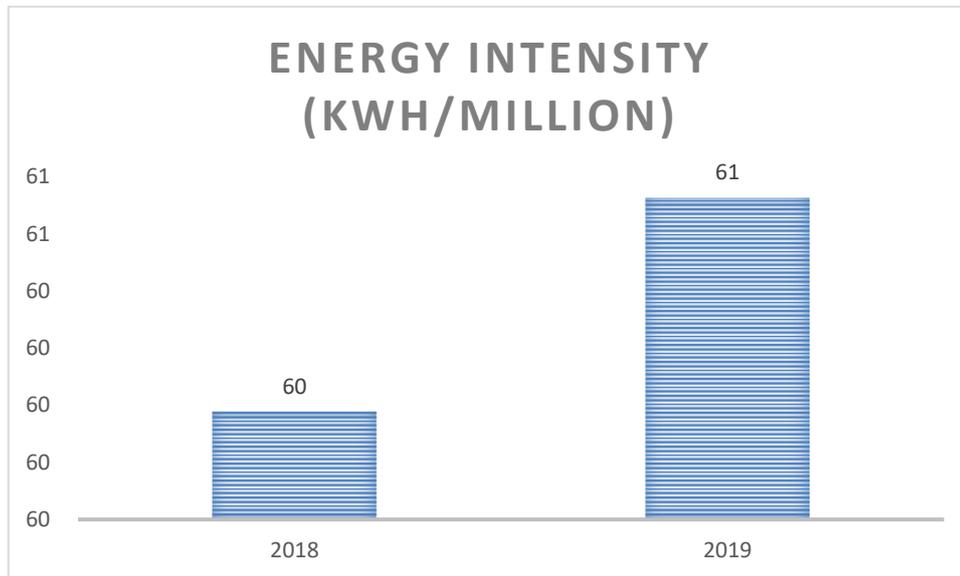

ELECTRICITY-CO2 EMISSIONS (KG)

Energy intensity (Consumption per million revenue)

Item	Year	2018	2019
Annual revenue (million)		920	829
Water intensity (gallons/ million)		28	34
Electrical intensity (kWh/million)		60	61

3.3.2 Energy management - water

The water used in Durabook comes from tap water, because only office domestic water does not affect the local water resources environment; domestic sewage generated by office activities is directly discharged from the building sewage pipeline into the public sewer system, and finally discharged to the sewage treatment plant for proper

treatment.

In recent years, there have been droughts or rainstorms due to abnormal climate factors, and water scarcity events have occurred frequently. Although the company only has office activities, the domestic water consumption is not much. Through daily promotion, it promotes the idea of saving colleagues and minimizes the waste of water resources, in order to meet the company's environmental policy to improve the efficiency of water resources use.

3.3.3 Energy saving plan

Proclaim that when you leave the office, you can turn off the lights and turn off the power of the computer equipment; turn off the lighting in public areas during lunch breaks and off hours.

If it is not necessary, there is no need to turn on the lighting power of unused meeting rooms, computer rooms, file rooms and other spaces.

We attach great importance to the energy saving of products. In order to reduce energy consumption and reduce greenhouse gas emissions from power plants, we promote products to obtain Energy Star certification to ensure product energy conservation efforts.

3.4 Green product

The trend of non-toxic twilight in the international community has become a basic requirement of all countries. DURABOOK continue to protect the earth with the utmost efforts. In view of the increasing impact of global climate change, DURABOOK continue to strengthen the collection of national laws and customer requirements, develop a green product management mechanism, assess the compliance of green products, introduce environmentally friendly design concepts during the product development phase, and add energy-saving and low-risk Concepts such as easy recycling, face environmental protection issues, implement internal inspection and control, ensure products meet the requirements of green color, and ensure that materials are controlled from the source, DURABOOK into GPM (Green Product Management) green product management system, and ensure that materials meet international standards. The requirements of the twilight regulations, from the parts to the product's twilight, reduce the use of harmful substances in the product, and make a contribution to our planet.

3.4.1 Green design

DURABOOK are based on international environmental labeling, and the color design project is low-harm, easy to dismantle, less packaging materials, low energy consumption, and other color concepts. As an important color consideration, the

products of DURABOOK are in line with Now and without environmental protection needs.

DURABOOK is innovative in color and fully introduce the concept of “green products”; not only “suppliers without harmful substances”, “materials without harmful substances”, “factory production processes without harmful substances” and “none” The control of the four major non-hazardous substances of the product quality of hazardous substances is completed in each operation step of the enterprise to facilitate the sustainable development of the overall environment.

DURABOOK integrate easy disassembly into product design, use explosion map for easy disassembly analysis, analyze the structure diagram of each product, and count the required disassembly time, improve product assembly structure and reduce disassembly and recovery operation time. , meet customer and relevant regulatory requirements. According to the requirements of the customer's environmental certification regulations, the disassembly manual is prepared and the product recovery rate ($3R = \text{Reuse} + \text{Recycle} + \text{Recovery}$) is calculated to meet the overall recycling rate requirements of the product.

In addition to considering the protective effect of the products, DURABOOK pay special attention to environmental protection, can be recycled, and contain no harmful substances, in order to comply with EU packaging directives and national regulations, such as packaging issued by the European Union. The requirements of the Packaging Waste Directive are of the utmost importance for environmental protection and resource recycling.

When developing new products, DURABOOK is included in the customer's needs. According to the energy consumption requirements of the environmental label, the product's compliance, environmental performance in the overall life cycle, and possible alternative technologies for other parts are sought. Improve product environmental performance, develop products that are more environmentally friendly, and develop low-energy products that meet the requirements of Energy Star's low energy regulations.

Responsible for environmental protection 3R (Reuse reuse, Recycle recycling, Recovery recycling), DURABOOK computer and DURABOOK from the product design, the resources will be recycled, reuse, easy to decompose, easy to disassemble the concept of integration, reduce the waste of the earth's resources. The recycling rate of wood packaging materials of the company's notebook products is over 80%. In addition, DURABOOK Computer and DURABOOK own brand products are set up in the United States for recycling services.

3.4.2 Conflict mineral policy

As a good corporate citizen, DURABOOK is committed to social responsibility and respect for human rights, and continues to pay attention to conflict minerals issues. It is committed to investigating the supply chain in detail to ensure tin (Sn), tantalum (Ta), tungsten (W), Metal materials such as gold (Au), cobalt (Co), and palladium (Pd) are not mined from mining areas controlled by armed groups in the Democratic Republic of the Congo and its neighboring countries.

Therefore, DURABOOK has formulated the following policies and promises:

1. Do not purchase conflict metals from conflict zones.
2. Require suppliers to refuse to use conflict metals from conflict zones and issue a letter of commitment.
3. Require suppliers to communicate this request to their upstream suppliers

DURABOOK Conflict Minerals due diligence investigation measures:

DURABOOK is commissioned by the direct supplier, DURABOOK Computer, to implement a conflict minerals due diligence process, including the due diligence framework in the OECD Guidelines. In addition to protecting human rights, it is important to ensure that the mineral sources in the products are legal. And can not directly or indirectly fund or provide benefits to armed groups. All supplier conflict minerals surveys were completed and met.

The DURABOOK Due Diligence Program contains the OECD architecture as follows:

Establish management procedures

Identify areas of risk in the supply chain

Establish a program to respond to the identified risks

Require suppliers to conduct due diligence investigations of smelters and refineries and, if necessary, require smelters to carry out relevant verification

Publicly available annual smelter list for supply chain due diligence results

The DURABOOK due diligence investigation is as follows:

Planning and developing conflict minerals policies and due diligence methods by the Office of Sustainable Development.

The company establishes procedures for the management of conflict minerals and confirms the relevant rights and responsibilities of internal personnel.

Provide stakeholders with conflict minerals communication pipeline.

Provide employee and supplier education and training related to conflict minerals policy and due diligence.

Suppliers are required to use the Responsible Minerals Initiative (RMI) Conflict Minerals Report Template (CMRT) to provide smelter or refinery information once a year.

Confirm and analyze according to the CMRT returned by the supplier, confirming that the

mineral is not from the conflict mining area.

Continuous communication with suppliers to improve response rate and improve the correctness of smelter information.

Uncover the list of smelters or refineries confirmed by due diligence and publish them on the website of DURABOOK.

4. Common Prosperity

4.1 Human Resources

The employees of the company are mainly staff members, and the number of employees remains stable. The total number of employees in 2019 is 21 in Durabook in the United States. The total number of Male is 71%, Female is 29%.

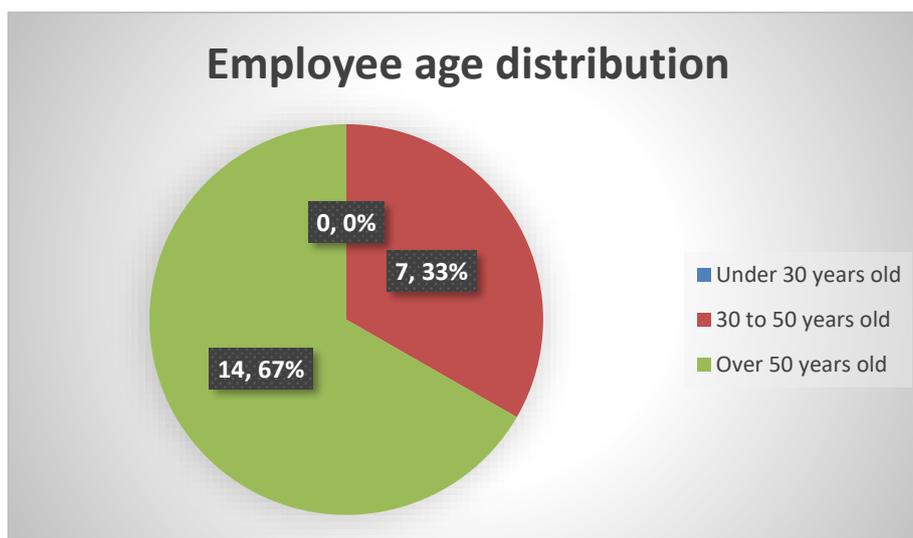

Table 4-1 Three-year comparison table of employee gender and regional population

Durabook	gender	2017	2018	2019
	Male	10	12	15
	Female	6	6	6
Total		16	18	21

Employee age:

All employees are divided into three groups according to age: 30 years old, 30-50 years old and 50 years old. The total number of employees is based on the end of December 2019.

Durabook employees are hired locally.

Durabook pays attention to the employment of local talents. The management class employs 100% of the local residents, and the definition of high-level management here is at the director level (inclusive), totaling 4 people(1 male and 3 female).

Employee turnover rate analysis

In 2019, there were 3 new employees, and the new rate was 14. 3% ; the employee turnover rate was 9.5%

4. 2 welfare system

Durabook's salary includes salary and bonus. The salary is based on the background of the employee's academic experience, professional knowledge and technology, and the seniority experience. It will not be different because of gender, religion, race, nationality, and party. The equal pay for men and women is indistinguishable. The minimum salary set by the

Laguna Act, and its salary is determined by reference to domestic and international salary surveys. In addition, Durabook implements employee performance appraisal every year, and distributes annual performance bonuses based on individual performance. In 2019, the proportion of participation in performance appraisal is 100%. The supervisor will give a fair and objective assessment based on the performance and goals of the employees, and understand the status of the employees through interviews and provide appropriate assistance.

The employee welfare system of the enterprise family is an important factor that affects the employee's intention, peace of mind, and sustainability. The provision of each welfare activity is an important event in the life of the employee. It is also a major event that Durabook pays attention to. The company welfare and the welfare support of the employee welfare committee are matched with each other, and are specifically presented in various items of employee welfare, with a view to implementing perfect care.

In addition, the company regularly pays pensions to employees to take care of their colleagues' retirement life. The company's new retirement reserve is set aside according to the provisions of the Law on Labor, which provides 6 percent of the total wages of the workers each month as a retirement reserve to facilitate the retirement career planning of employees.

Durabook provides parental leave, does not affect job opportunities due to gender differences, and provides a quality nursing room environment. The number of parental leave in 2019 is 0, and the 2017 and 2018 childcare stays expire.

4.3 Career development

We believe that only by persisting in continuous learning and training to improve employee functions and product quality can we achieve the above goals and meet the needs and expectations of our customers, employees and shareholders, thus achieving the status of leaders and industry standards. We believe that every employee has the potential to become the company's human assets through training, and thus become the core competitiveness of Durabook, which will lead to a win-win situation for the company's growth and employee growth.

We are committed to providing systematic and professional training, nurturing and mentoring to all employees of Durabook. Durabook provides the right resources to enable each employee to acquire multiple technologies and knowledge to effectively carry out the company's tasks. , a professional guide to the development of corporate strategy and quality training.

4.3.1 Key Courses in 2019 - On-the-job Training

In the past three years, Durabook has set up core cadre management and related courses at all levels to enhance the management functions of new talents in the future. At the same time, in addition to strengthening new product knowledge, it has also opened up Through the case and discussion, learn to combat the sales force of the sales staff.

4.3.2 e-learning learning - no distant

In 2019, the total head coach was 32 hours, with an average of 1.5 hours per person. Average training hours for men and women Male: 1.3 hours, female: 2 hours.

4.4 Employee care

In response to the global market of international competition, corporate competition no longer relies on natural resources, cheap labor, sophisticated machinery and strong financial resources, but mainly rely on knowledge-intensive human capital. Therefore, employees are the core lifeline of the company's sustainable operation. The company attaches great importance to every employee. Durabook continues to focus on: implementing employee education and training, improving staff professionalism, establishing a perfect welfare system, safeguarding employees' basic rights and interests, providing a safe working environment and taking care of Employee health, emphasis on labor relations, and promote harmonious relations to continuously improve the overall quality of Durabook people. In the employee care section, statistics did not occur in the 2019 year due to race, gender, color discrimination cases, forced labor incidents, and violations of the rights of indigenous people.

Durabook has always spared no effort in caring for its employees. It organizes activities from time to time to promote employee exchanges, experience different cultures, and unite employees.

Durabook constructs a smooth communication channel for employees. If any unit is found to be in violation of regulations or illegal circumstances, it can file a complaint and report to the company through relevant channels, and has an untrustworthy mailing box and a sexual harassment report box for employees to appeal. In 2019, the company did not have any complaints related to human rights. In order to ensure the smooth flow of labor and management communication, we hold a labor-management meeting every quarter. There are 7 representatives from both sides of the labor and management. The discussion topics are divided into labor dynamics, production planning, quality, safety and health, welfare committee activities, and six temporary motions. section. All quarterly corporate meetings are held every quarter, and employees can express their opinions through the temporary motion period.

4.5 Customer Service

Durabook have entered into "Contract Review Procedures", "Disbursement of Sales and Customer Litigation" and "Customer Service Procedures" to enhance professional service quality in all aspects, win customer trust and achieve long-term profitability of the company. . In order to provide customers with the best service to give customers the greatest satisfaction, and to ensure that customers have complaints, can effectively accept, and influence or cause product quality to buy common phenomenon, discuss and analyze to improve and prevent, customers can through the marketing channel In response to a complaint, we will urge the quality assurance unit to actively deal with and improve the problem. There were no violations of the relevant customer complaints in 2019.

In order to protect the privacy of customers, Durabook have developed a “funding management procedure book” to manage internal staff and customer data to avoid the leakage or improper use of personal funds, resulting in damage to the rights of individual shareholders. Personal data obtained by the company for its operations, whether it is a paper or a file, can be marked as "confidential documents" and kept by a special person. In order to ensure the security of the client secrets without the outflow of data, there was no case of any outflows related to customers in 2019.

In order to effectively improve customer satisfaction, Durabook regularly conduct customer satisfaction surveys, and actively implement improvements for dissatisfaction or customer suggestions. The average customer satisfaction score for 2019 is 89.3.
